SUMMARY

❑ 8.5 years of relevant experience in SAP HANA, ABAP & SAP OData with different types of SAP projects like Implementation, upgrade and support for reputed clients into different business sectors.

❑ Expertise in **SAP HANA Data Modelling**, SQL Script, **ABAP CDS with BOPF**, **AMDP, XS OData, XSJS, SAP ABAP, OData** and **Native HANA Development**.

❑ Having knowledge of SAP **Analysis for Office** (AO), **SAP KPI modeler**, **FIORI Launchpad Configurations**, **Block chain** development using **Hyperledger Fabric** and Robotics Process Automation using **Blue Prism**.

❑ Having expertise in SAP Workflows, Enhancements and all RICEFW concepts.

❑ Have completed several end-to-end implementations on **SAP S/4 HANA 1809/1709** & traditional systems.

❑ Involved directly with client for Requirement gathering, Design, Development & Implementation, Enhancement and Support during end-to-end implementation.

❑ Have worked on multiple SAP modules such as Sales & Distribution, Material Management, Finance etc. to develop & support applications for client business and internal processes

❑ Have conducted Workshop and part of Fit-Gap cycle to understand the requirement and design solution accordingly.

❑ Lead Technical Team and mentored junior resources in various projects.

❑ I have been a consistent performer in Deloitte and was rated 1 for the past 4 years. Received 7 awards during this time for outstanding contribution to the project and other firm initiatives.

EMPLOYMENT DETAILS

Organization   : Deloitte Consulting
Duration   : January 2014 – Till date
Role   : Senior Consultant

Organization   : Infosys Technologies
Duration   : November 2010 – December 2013
Role   : Senior Systems Engineer

PROJECT DETAILS

#Project 1

Client	HPE
Role	Technical Lead
Duration	4 months

Responsibilities:
- Leading 11-member team for HANA and ABAP developments.
- Designed and developed gateway services and guided the team in development across Gateway and HANA.
- Managing team activities, code review, performance tuning and debugging applications.
- Responsible for cutover and system pre-check before releasing it to end user.
- Leading development team, assigning task and helping them solve critical issue and supporting them with solutions and workarounds.

#Project 2

Client	Walmart Ariba Integration
Role	HANA Consultant / Lead
Duration	11 months

Responsibilities:
- Led an Agile project for the client for SAP Ariba Integration with S/4 HANA.
- Responsible for designing and developing generic flex master data integration solution with Ariba which helped to upload any kind of custom data table to Ariba from S/4.
- Developed a solution for Invoice Integration from Ariba Network with S/4 using IDOCs.
- Created FIORI element-based reports in S/4 using CDS Views and UI Annotations for Invoice reporting.

#Project 3

Client	Sony Interactive Entertainment
Role	HANA / ABAP Consultant
Duration	12 months

Responsibilities:
- Worked on Material Sell Price determination using HANA. This involved development of complex Analytical and Calculation Views built on top of condition tables.
- Exposed the views via XSODATA services to display data in FIORI report enabling real time pricing information and achieving 99% reduction in turnaround time. **Received outstanding award for the same.**
- Developed complex workflow objects (Journal Entry Workflow, Credit Master Workflow, PO Approval Workflow). These objects were highly critical and important for end to end functioning of business.
- Created generic CDS views for Material Classification Information which was used across multiple objects.
- FIORI Configuration Lead: Responsible for 450+ FIORI Apps. configured for SIE. These was a high visibility task thereby helping the client to operate end-to-end business scenarios through FIORI apps with minimal SAP GUI usage.
- Worked on extension of standard CDS views on MARC, MBEW and created append CDS views.

#Project 4

Client	National DCP
Role	HANA / ABAP Consultant
Duration	35 months

Responsibilities:
- Developed multiple HANA reports for client which involved creation of Attribute View, Analytical Views and Calculation Views and HDB Procedures.
- Responsible for handling migration of all HANA artifacts via Delivery Units across landscapes.
- Worked on complex enhancement which required to add line items automatically to Sales Orders.
- Worked on conversion objects and reports which involved HANA Views being exposed to MS Excel via MDX.

Mini Projects:

#Project 5

Client	Deloitte
Description	Sentiment Analysis using RPA and HANA
Role	HANA / Automation Anywhere Developer

Responsibilities:
- Developed a BoT in Automation Anywhere which can download the contents of a webpage in a text file.
- Created a Python script to upload the unstructured data from file to HANA table and create Full Text Index of the data.

- Wrote queries in HANA to perform sentiment analysis on the token and literals to provide an insight to the customer about the product.

#Project 6

Client	Deloitte
Description	Sales Dashboard
Role	Native HANA Developer

Responsibilities:
- Developed 24 KPIs for Order-to-Cash module displaying key metrics at each step of OTC process.
- Created multiple Analytical and Calculation views on Sales Order, Delivery, Contracts and Invoice data.
- Exposed the views via XSODATA services to be used in FIORI application.
- Mentored other team members and helped on HANA development.

#Project 7

Client	Deloitte
Description	Blockchain Orchestrator
Role	Blockchain Developer

Responsibilities:
- Working on supply chain block chain solution using Hyperledger Fabric.
- Developed Block Chain Network in Hyper Ledger Fabric, Created Orgs, Channels and Peers to setup multi-channel communication.
- Deployed chain codes on channels and peers to invoke transactions over the network.

#Project 8

Client	Deloitte
Description	Deloitte Internal HANA Training
Role	Lead Trainer (August 2014 – Till Date)

Responsibilities:
- Trained multiple batches on core HANA concepts covering topics like, HANA Modelling using Attribute, Analytical, Calculation Views and HDB Procedures.
- Impart knowledge on HANA artifacts managements, using HANA artifacts via ADBC, creation of services via XSJS or XSODATA.
- Received multiple awards for continuous involvement on this initiative.

#Project 9

Client	Deloitte
Description	Deloitte Master Data Administration
Role	OData / ABAP Lead

Responsibilities:
- DMAS is a high visibility customizable master data administration solution allowing for easy data approval and governance. This was showcased in SAP Sapphire 2018.
- Developed 6 UI apps for Finance and Logistics Process areas.
- Lead and managed the ABAP / OData Development team.
- Helped in designing the solution architecture and workflow design.

#Project 10

Client	Price Waterhouse Coopers
Role	SAP ABAP Consultant
Environment	SAP ECC, SAP R/3 4.6C
Duration	38 months

Responsibilities:

- Worked as an ABAP developer supporting different modules namely FICO, HCM-T/E, CE and SRM.
- Developed a tool in ABAP for weekly and monthly analysis of resolved tickets for adherence to Service Level Agreement. The tool is being successfully used for reporting across the boards.
- Developed a generic tool with the Travel and Expense team for the automatic variant creation and batch optimization of CAT7, PREC and PRFI jobs.
- Created an extractor function module for BW team and performed testing in RSA2.
- Created ABAP queries for FICO Asset Management team which helped them to get reporting data from custom tables.
- Enhanced the standard transactions for time booking (CAT2), transfer time sheet to controlling (CAT7) and WBS Result Analysis (KKA2) to store additional data in database tables.
- Interacted with the .Net and Mobility team for design and build related discussions.
- Worked as an ABAP developer during the SPDD, SPAU and UCCHECK phases of technical enhancement of objects.
- Performed the Unicode Conversion of customized reports, RFCs, function modules and customer exits.
- Involved in resolution of technical issues during Unit Testing, System Integration Testing, and Regression Testing and UAT phases of project.

ACADEMIC CREDENTIALS

Bachelor of Technology in Computer Science, 2006-2010 from Uttar Pradesh Technical University, India with an aggregate of 73.8% marks.

ACHIEVEMENTS

- Consistent 1 rater for past 4 years in Deloitte.
- Received multiple appreciations from client for on time delivery and quality of work.
- Winner of Technology Premier League which was a firm wide app building contest across technologies. Demonstrated an app built for telecom sector for equipment tracking and was awarded 1st prize for same.
- Mentioned in top 150 ideas by Open SAP for their course Imagine IoT.
